Lynne Evans Events can offer a comprehensive range of conference and event management services, whether an event is to be held in the UK or overseas.

Providing a superb blend of experience, capability, resources and specialist skills &ndash; coupled with a high level of personal commitment, we will ensure your event is a success.

We can provide a team of dedicated event managers, venue sourcing suppliers, conference producers, caterers, flower designers and AV/technical suppliers to devote their tireless energy, wide ranging expertise and unflinching enthusiasm to help you make your meeting, conference, exhibition or event the very best it can be and maximising the return on your investment.

Experienced event professionals can make the job look easy - and more importantly, make it simple for you to do what you are best at. Whether being provided with a total event service package, or just an individual component such as finding a venue, researching a conference programme, speaker liaison or on-site assistance - if you have limited internal resources, and purely want to share the workload, we will be happy to co-ordinate efforts with yours.

All we ask is that you have high expectations, and trust us to fulfil them.

The 1st World Future Energy Summit is held under the auspices of the Government of Abu Dhabi as part of a major world initiative to bring together the leaders of companies and the innovators of technologies that are developing the solutions for the world's demand for alternative and renewable energies.

The World Future Energy Summit (WFES 08) will provide a unique meeting opportunity for academics, financiers, entrepreneurs, innovators, and the companies behind the cutting edge technologies and systems of sustainable energy alternatives to meet, discuss, and bring to reality a foundation of alternative energy solutions for a cleaner future. Visit: <http://www.WFES08.com> A Practical Guide to Sustainability

The conference offers a unique opportunity for debate between all the commercial participants in the sustainability debate &ndash; focusing on practical, achievable strategies which make economic, social and environmental sense addressing all components on the sustainability "three legged stool". Case studies, panel sessions and round table discussions will form the backbone of the event, providing delegates with a 'sustainability toolkit' to take back to their respective organisations.
